

GREENYELLOW STRENGTHENS ITS PRESENCE IN REUNION ISLAND WITH THE ACQUISITION OF A 3.1 MWp SOLAR PORTFOLIO

GreenYellow, a global leader in decentralized energy transition, announces the acquisition of a portfolio of 18 rooftop photovoltaic plants in Reunion Island, representing a total installed capacity of 3.1 MWp in grid injection. This transaction reflects the company's commitment to strengthening its long-term presence in France's Overseas Departments and Territories (DOM/TOM) and supporting national energy independence by actively contributing to the production of green, local and decarbonized electricity.

AN ANNUAL ELECTRICITY PRODUCTION OF OVER 4.3 GWh

Thanks to this acquisition, GreenYellow will increase its renewable electricity generation capacity in Reunion Island, with an estimated **annual production of over 4.3 GWh** — equivalent to the **yearly electricity consumption of more than 1,360 residents** of the island.

A LONG-TERM PLAYER COMMITTED TO DECARBONIZING CORPORATES & LOCAL AUTHORITIES

Benoît Regnard, General Manager of GreenYellow Austral, states: *“This transaction is fully in line with our strategy: to provide long-term support to C&I corporates in their decarbonization journey by reducing their energy dependency while ensuring performance and sustainability. By directly owning and operating our assets, we reaffirm our ambition to be a long-term energy operator rooted in the overseas territories.”*

With already more than 750 clients supported in their solarization and 1.1 GWp of installed operational capacity, GreenYellow proves every day that:

- Solar energy is a driver of competitiveness.
- It creates value for both corporates and their clients.
- It accelerates the energy transition on a large scale.

A SUCCESSFUL COLLECTIVE EFFORT

GreenYellow would like to acknowledge the commitment of all its internal teams in making this remarkable transaction a success, warmly thank the seller for the quality of the collaboration and exchanges, the Ravetto Associés law firm for its legal support, as well as Envinergy for its decisive role in facilitating the connection.

ABOUT GREENYELLOW

GreenYellow, a French company founded in 2007, has become in 18 years a major player in the energy transition in France and internationally, and a true partner of corporates and local authorities in their decarbonization journey and quest for energy independence.

As an expert in decentralized solar photovoltaic production, energy efficiency programs, energy storage, and electric vehicle charging infrastructure, GreenYellow supports its clients across the entire value chain. The group ensures the study, financing, development, and operation of assets that allow them to produce green, local, and competitive energy, reduce their energy consumption, while strengthening their competitiveness.

In 2024, the projects carried out by GreenYellow helped avoid the emission of almost 546,000 tons of CO₂ equivalent. The group also aims to achieve carbon neutrality ("Net Zero") for scopes 1 and 2 by 2040.

Operating in some 15 countries across 4 continents, GreenYellow innovates by constantly enriching its unique and global platform of offers to support its 1,400 clients in their transition to a more sustainable energy model and meet the challenges of climate change.
